Site Management SectionSUBJECT: Press Release for the  
Monon Municipal Well Field

EPA Region 5 Records Ctr.

322773

The Division of Land Pollution Control (DLPC) intends to submit a press release to the Monon News located in Monon, Indiana. The purpose of this press release is to notify Monon residents that the DLPC intends to conduct a well survey in the area. The well survey results will be useful when staff devises a strategy for identifying the source of Monon's well field contamination and in locating a new well field. The press release is as follows:

"The Division of Land Pollution Control (DLPC) of the Indiana State Board of Health, in cooperation with Monon's Municipal Water Department will be conducting a study to determine both the source of Monon's municipal well field contamination and potential locations for a new well field.

In the first phase of the study, the DLPC will be requesting the assistance of residents in locating all private wells in Monon. If you have a well on your property, please notify Mr. Gary Quade of the Monon Municipal Water Department, at AC 219/253-6441. Once the survey has been completed, well owners will be contacted by the DLPC to schedule a sampling date."
